- RACK MILLS

THIS IS THE DRAKE EXPERIENCE.

# MACHINE TOOLS

Drake's advanced thread grinding technology is powered by PartSmart™ software and optimizes grinding processes. All Drake machines are fully programmed and include special applications that ensure form and accuracy. Drake's industry knowledge and process expertise, paired with continual investment in research and development, provide our customers with a competitive advantage.

# SERVICE RELIABILITY

A machine tool investment is intended to boost productivity, but also requires maintenance to ensure that it continues working at an optimum level.

When you need support, know with confidence Drake will be there.

**DRAKE PROTECTS THE VALUE OF YOUR INVESTMENT BY OFFERING PRODUCTS AND SERVICES FOCUSED ON:**

Improving machine reliability and maintainability

Minimizing unplanned downtime and operational waste

Optimizing machine performance

Extending machine tool service life

With preventive maintenance programs, OEM part kits and a global network of experienced field support specialists, Drake is equipped to keep you productive.

# AUTOMATION

# CONSISTENCY

The demand for robotic process automation has never been greater. Drake develops automation solutions for precise parts handling to achieve maximum productivity and repeatability. Our team of engineers design and program the complete automation process unique to your specific application. With Drake automation solutions you will deliver consistent, high-quality results.

We invest in customers by providing accuracy, reliability and consistency each step of the way.
